GENERAL DESCRIPTION

The Macrotron MS3816L1672S-07 is a PC133 Compliant 16M bit x 72 bit Synchronous Dynamic RAM high density memory module. It consists of nine CMOS 8M x 16 bit with Synchronous DRAMs in TSOP packages and a 2K EEPROM in 8-pin TSOP package on a 168-pin glass-epoxy substrate. Decoupling capacitors are mounted on the printed circuit board in parallel for each SDRAM. The product is a Dual In-line Memory Module and is intended for mounting into 168-pin edge connector sockets.

Synchronous design allows precise cycle controls with the use of system clock. I/O transactions are possible on every clock cycle. Range of operating frequencies and programmable latencies allow the same device to be useful for a variety of high bandwidth, high performance memory system applications.
